Description
Generac’s Molded Case Type Transfer Switches are rated for full load transfers in critical operating, emergency, legally required, and optional power systems.

The internal dead front cover allows for manual operation under load with a permanently affixed handle. The full assembly is listed to UL 1008 with exceptional withstand and closing ratings.

The microprocessor-based ATS controller offers standard features of Modbus® RTU and pretransfer contacts, with three phase sensing on both sources plus load for voltage, frequency, sequencing, loss and unbalance. The mimic diagram displays source availability and connection, providing “at a glance” indication, further simplifying users interface. The controller is designed beyond industry EMC standards with a time-stamped history log. The integrated plant exerciser is configurable in off, daily, 7, 14, or 28 day intervals with user configurable run time.
