Description
Generac’s Bypass, Power Frame Type Transfer Switches have exceptional 3-cycle withstand and closing ratings along with high speed switching time of < 3 cycles to minimize the effect of power disturbances. The power switching devices are interchangeable between the ATS and Bypass. The switching mechanism is enabled for safe manual transfer under load. With integral contact wear indication, preventative maintenance can be scheduled when convenient for the user ensuring maximum uptime. System parameters can be uploaded with a USB drive in moments, minimizing installation time.

The control’s 4.3 inch color display and mimic bus diagram simplifies programming, routine operation, data presentation, and setting adjustments. The intuitive, grouped data screens along with the supervisory and highly customizable data acquisition allow the user to configure to their needs. Standard features include Modbus® RTU, extensive user customizable input / outputs, 450 event log with capture for the most recent 12 events, with three phase sensing on both sources, plus load for voltage, frequency, sequencing, loss, and unbalance.
